

MEGA VISION ASSOCIATION UGANDA

Mega Vision Association is a registered Organization dedicated to improving the lives of people in Uganda, and we have been dedicated to this goal since 2017. In the past seven years, we have empowered and supported youth especially teenage mothers and the Vulnerable boys to change their lives.

There has been a great neglect of boy child in Uganda as their issues are being ignored. There are increasing cases of sexual harassment, abuse, or neglect of the boy child, many of which end up unreported due to ignorance. This situation has made the boy child lag behind, as people believe that it is only the girl child who is vulnerable and needs attention care and support.

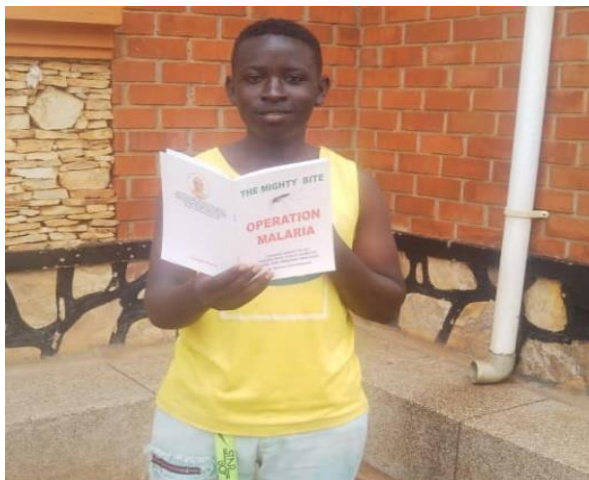

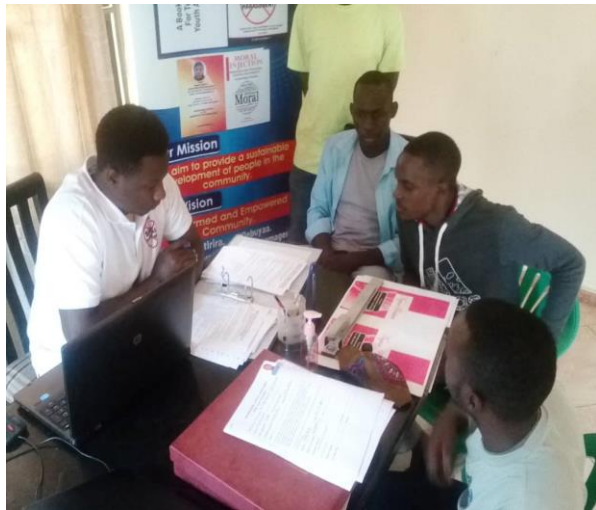

This has therefore led to vulnerable, orphans, uneducated, poor, homeless, needy, abandoned, neglected, and frustrated boy child to the streets others to outlaw sects, drug and substance abuse. It is this situation that has led to a lot of criminal activities, and violence which are threats to the Girl child and National security.

It is in this regard that 'BOYS TOO EXIST' was found to empower every boy child and enlighten the community on the need to give equal opportunities to all the children irrespective of sex.

It's a shame to me for the parents who migrate from their home countries to other countries to have pressure majorly for the girl child they leave behind than the boys. They clearly and openly state that their prayer is to have their daughters join them, mindless of the boys at all. It is true that the girl child is sensitive but the way they state it shows no concern at all for the boy child. Forgetting that it is those neglected boys who turn into thugs, drug addicts, hooligans and it is them who rape their lovely girls, mistreat them and finally a burden to their families and the nation at large.

In Mega Vision, we have witnessed many young fathers who have also been chased out of their homes. Parents tell them that its now time to go and start their future else where since they decided to have children at such an early age. Most of them end up becoming thugs and other indiscipline which in the end becomes a national problem too.

As Mega Vision we involve boys, young fathers and vulnerable boys to train in all developmental activities such as Bakery, Body Jelly, Cookery and many other activities. The awareness is to all. Those in school and the drop-outs. The photos below well explain the said statement.

#UgandaReading Challenging Nakawa Market Vendors

Date: March 17, 2017

Your involvement is the only way our boys, young fathers and the vulnerable will also have happiness in our community, country and the world.
